Guidance for Using the Onboarding Grid:

- * Documentation of COVID and Flu vaccine is a CMS and NHSN regulatory requirement for all hospitals. Non-hospital sites (MedStar Medical Group and MedStar Home Health Care) are exempt. We appreciate your assistance in providing this information. Note: COVID vaccine is not required, however seasonal flu vaccination is required. Both require documentation.
- ** Maryland Universal Onboarding (UO) for pre-licensure nursing students can replace double asterisk** requirements. Must provide certificate of UO completion. Instructors must complete SiTELS, not UO.
- *** Please defer to MedStar entity for collection practices for these items.
- **** License or certification must be in state of placement. If student/instructor is employed at a MedStar facility in a different state than placement, must produce proof of license or certification in placement state.
5. Additional entity requirements for badge access, EHR access/training, and other may be requested. Please seek guidance from entity coordinator.
