

Corporate Partners Program

Thank you for your philanthropic partnership with MedStar Health.

We are grateful for your participation in the Corporate Partners program. The impact of your support benefits all of our systemwide hospitals and specialized institutes in quality and safety, research, and innovation.

Here are some of the ways that your generosity impacts our patients and families:

MedStar Georgetown University Hospital is the first and only hospital in Washington, D.C. to offer one of today's most advanced cancer fighting treatments: proton therapy with **HYPERSCAN™**.

48 oncology patients received transportation to medical appointments through the **Transportation Fund at MedStar Franklin Square Medical Center**—totaling **621 rides**.

The cardiac surgery team at the **MedStar Heart & Vascular Institute** received the highest quality care rating from the Society of Thoracic Surgeons for the following programs:

- Coronary artery bypass graft
- Aortic valve replacement
- Mitral valve replacement and repair

In 2018, the **New Investigator Fund** at the **MedStar Health Research Institute** granted six researchers scholarships to support research initiatives to advance health for the patients, families, and communities we serve.

The **2018 Telluride Experience** at the **MedStar Health Institute for Quality and Safety** funded scholarships for five MedStar Health residents and nurses to attend the four-day immersive quality and safety training.

The **MedStar Telehealth Innovation Center** within the **MedStar Institute for Innovation** virtually brings medical care through:

- **TeleStroke:** on-demand MedStar Georgetown University Hospital neurologists are available to assess and consult stroke patients within emergency departments across the system
- **TeleGold:** on-demand MedStar Washington Hospital Center emergency physicians are available for triage support in hospitals and two of the MedStar PromptCare locations
- **Surgical Preoperative Visits:** piloted with the MedStar Georgetown University Hospital plastic surgery team, patients are able to virtually conduct preoperative visits with surgeons
- **E-Visit:** patients can conveniently receive acute care treatment from home

The **Inpatient Rehabilitation Center at MedStar Good Samaritan Hospital** will combine all inpatient services into one highly efficient, state-of-the-art facility to include:

- New private patient rooms with a space for visitors
- More accessible therapy gym, equipment, and patient-related care rooms
- Open physical and occupational therapy collaboration treatment areas
