

Our Mobile Health Center.

Serving neighborhoods across South Baltimore.

Knowing you need to see a doctor is one thing. Sometimes, being able to get to a doctor's office is another. The MedStar Health Mobile Health Center offers a solution. Here's what you should know:

What health services will be available?

We offer primary care health services and can connect you with other resources for behavioral health services, health screenings, rapid HIV testing, and diabetes self-management, if needed.

Can I use the Mobile Health Center for emergencies?

Our providers offer basic care. If you have a serious health problem or an emergency, you should dial 911 or go to your closest emergency department.

Will I need to schedule an appointment?

Walk-ins are accepted. However, we encourage appointments so we can keep wait times down.

Why will MedStar Health be offering this service?

Many people who need medical care are not getting it because of transportation issues. The mobile health center brings the services you need to your community.
